

Lev Hasharon Mental Health Center (MHC) is a public hospital which provides psychiatric services to a vast and diverse population. The campus is located at the heart of the Sharon district (north of Tel-Aviv metropolis), hosting 360 beds in 11 inpatient wards, treating both acute and chronic patients. The Simon Wiesenthal Holocaust Survivors Residence, part of Lev Hasharon MHC, is home to elderly patients with comorbid mental and physical disorders. In addition to our outpatient clinic within the main campus we host three additional clinics located in Netanya, providing ambulatory psychiatric services to hundreds of patients of all ages.

Link with Community: Students Visiting

Link with Community: ART & Music Therapy

Our mental health center supports integration of music therapy, as a major bridge between inpatients, families and community.

Music is also part of the everyday routine in the ward. The following song was composed especially for a long term closed ward and is played every morning as a signal for breakfast.
